Article index

Number 1

Development of a generalized knowledge source structure for blackboard systems
C.S. Ho and C.H. Keng 5
Diagnostic expert system inference engine based on the certainty factors model
S. Tzafestas, L. Palios and F. Cholin 17
Feasibility study and impact assessment for a knowledge-based information-technology planning system
G. I. Doukidis and G. I. Karakoulas 27
Expert system for evaluating product liability claims
W. Raghupathi, L. I. Schkade and K. Harbison-Briggs 37
Structuring and modules for knowledge bases: motivation for a new model
G. Antoniou and I. Wachsmuth 49
Knowledge engineering as cross-examination
J. S. Fulda 52

Number 2

Strategy for integrating object-oriented and logic programming
R. Bose 66
Multi-agent conflict resolution: a computational framework for an intelligent argumentation program
J. A. A. Sillince 75
MAKRS: a knowledge and belief representation system for multiple agents
Y. H. Kim, S. R. Maeng and J. W. Cho 91
Knowledge-based clustering approach for data abstraction
V. Sridhar and M. Narasimha Murty 103
Multi-paradigm software environment for the real-time processing of sound, music and multimedia
A. Camurri, C. Innocenti and C. Massucco 114
MIDAS: an application of model-based reasoning for the diagnosis of hydraulic systems
N. F. Doherty and A. K. Kochhar 127
Integration of scientific data and formulae in an object-oriented knowledge-based system
M. V. Krishnamurthy and F. J. Smith 135
Evolving prototype control rules for a dynamic system
T. C. Fogarty and R. Huang 142

Number 3

Knowledge representation form in mechanical engineering
R. Bello, D. Gálvez, G. Sánchez, M. M. García and G. Benavides 154
Knowledge representation for preliminary stages of engineering tasks
I. F. C. Smith and S. Boulanger 161
Parallel search-and-learn technique for solving large scale travelling-salesperson problems
C. P. Ravikumar 169
DyKOr: a method for generating the content of explanations in knowledge systems
A. Lopez-Suarez and M. Kamel 177
Speedup of hypothetical reasoning by experience-based learning mechanism
T. Makino and M.Ishizuka 189
Building an interactive blackboard framework
M. Sunners, D. Dawson and P. Sydenham 199
Interpretation of neural networks as Boolean transfer functions
G. P. Fletcher and C. J. Hinde 207

Number 4

Turning breakdowns into opportunities for creativity
G. Fischer 221
Method to assist the building and expression of subjective concepts and its application to design problems
M. Sugimoto, K. Hori and S. Ohsuga 233
Programmable applications for the arts: computational tools for hand, eye and mind
M. Eisenberg 239
Interactive multimedia — creative catalyst or constraint?
N. Flint and J. Sparrow 247
Designing for radical tailorability: coupling artifact and rationale
A. I. Mørch 253
Negotiation in collaborative activity: a discourse analysis
C. L. Sidner 265
Negotiation in collaborative activity: an implementation experiment
C. Rich 268
Work-oriented development of knowledge-based systems: a case for multiple perspectives
M. Stolze 271
Representing discourse for collaborative interactive generation
S. M. Haller 274
Maximally efficient dialogue mode algorithm
C. I. Guinn 277
Impact of variable initiative on a natural language dialog system
R. W. Smith 279
